

DDB Unlimited, Inc.

WOD SERIES

UL LISTED

Best Warranty in the Industry

Why Choose the WOD Series?

The WOD series outdoor enclosure is the ultimate choice for your outdoor racking requirements. They are .25" taller and 5.935" wider than our standard OD series and EMKA wind locks are standard equipment on the WOD series.

Being made of our own Alumiflex®, you'll find it noticeably lighter than steel, yet strong enough to rack even the heaviest equipment. Being designed to accommodate the weather protection of your choice, the WOD series enclosures are available in NEMA 3R, 4, or 4X configurations.

The additional Alumishield® (sun roof), provides superior solar protection with its large overhang roof design. Our own versatile strut system allows you to position the racking rails at any depth desired within the enclosure. You can rest assured your equipment is safe and secure with our three point padlocking handles on both the front and rear door that you secure with your own padlock.

The WOD series enclosures are available in various heights and depths. Our professional Sales staff and CAD-Engineering team are able to assist you with a state of the art design, a competitive price, and a guaranteed delivery.

Application Types

Provides a secure, climate controlled environment for any electronic equipment.

- Telecommunications
- Wireless/Broadband
- Fiber Optics
- Backhaul
- Base Station
- Small Cell/DAS
- Utility
- Military
- Trailer-based Communications
- Wi-Fi
- Flexible and Scalable

Industry Standards
