

R7 Series R7-54DXW

Why Choose the R7 Series?

The R7 series is built to the highest of American standards. "Rugged", "Built to last", and "American craftmanship" are words that defined an era and built a country. The R7 series embodies these words and the spirit that comes with them. Built in the heartland of America from our own patented Alumiflex®, lighter than steel, but strong enough to take on the heaviest of your outdoor racking needs. The R7 series comes with a multitude of functional standard features such as: incorporating the versatile strut system for adjustable racking, the security of a 3 point locking system, our patented Alumishield® solar cap to manage heat loads, side spool-up cabinet for cable entry, electrical panel with internal outlets, adjustable HVAC, and much more; all focused on giving the best value and turn key solution available. Our design is purpose driven with two objectives in mind, to ease the installation process which saves you time and money and to make sure your equipment is secure once you close the doors on your enclosure. DDB offers a state-of-the-art design, a competitive price, benchmark lead times and a guaranteed delivery, all backed up with an industry leading 15-year warranty on every enclosure. Put DDB's substantial stock to work for you today. Contact our professional staff to assist you with your made-to-order solution.

Application Types

Telecommunications Wireless/Broadband Fiber Optics Back Haul Small Cell/DAS Public Safety Utility Base Station Military Trailer-Based Communications Wi-Fi LTEE/4G/5G

Industry Standards:
