5G-LTE Enclosure w/ nVent HVAC

Why Choose the 5G-LTE Series?

The 5G-LTE series enclosure is the new evolution and standard for outdoor equipment racking applications. Being constructed of our Alumiflex® material, you'll find it noticeably lighter than steel, yet strong enough to rack even the heaviest equipment. We have taken everything that was great about the LTEE and made it better. With the 5G-LTE, you will continue to find all the standard features you need including HVAC climate control, electrical load panel and side spool cabinet, but we didn't stop there. We have added extra battery support for the increasing needs of battery backup, reversable 19' or 23" rack rails using our versatile "R-strut system" and improved the security and sealing ability of the 3-point locking system to give greater security and weather protection making this a superb battery enclosure. Again, and again, DDB leads the way with advanced design and features that just work. All while being the most competitively priced and readily available enclosure on the market. Put DDB's substantial stock to work for you today. Contact our professional staff to assist you with your made-to-order solution.
