

# SBS Series

## SBS-14127C

## Why Choose the SBS Series?

The SBS-14127C outdoor enclosure is a top choice for indoor and outdoor needs. Constructed with our Alumiflex® material, it is notably lighter than steel yet strong enough to easily support the heaviest equipment. The SBS series has an updated design, including a deeper compartment for more equipment space and improved door compression to keep the weather out. The SBS series can be used as an electrical panel, battery storage, communication cabinet, and more. Standard features include an aluminum removable back-plate, 1/4 turn-key locks, and rugged aluminum construction. Configurable for indoor or outdoor applications the available accessories add the ability to customize to your specific application with various mounting bracket types, including climate controls, venting options, and electrical/cable entry solutions. Every SBS enclosure includes DDB's unmatched warranty, the industry's best lead times, and competitive pricing. As expected, the DDB SBS series sets the mark as a design leader that is versatile and scalable to meet a wide array of situations. Contact our knowledgeable sales team for more information.
