

## MOP – Install HVAC onto DDB Enclosure

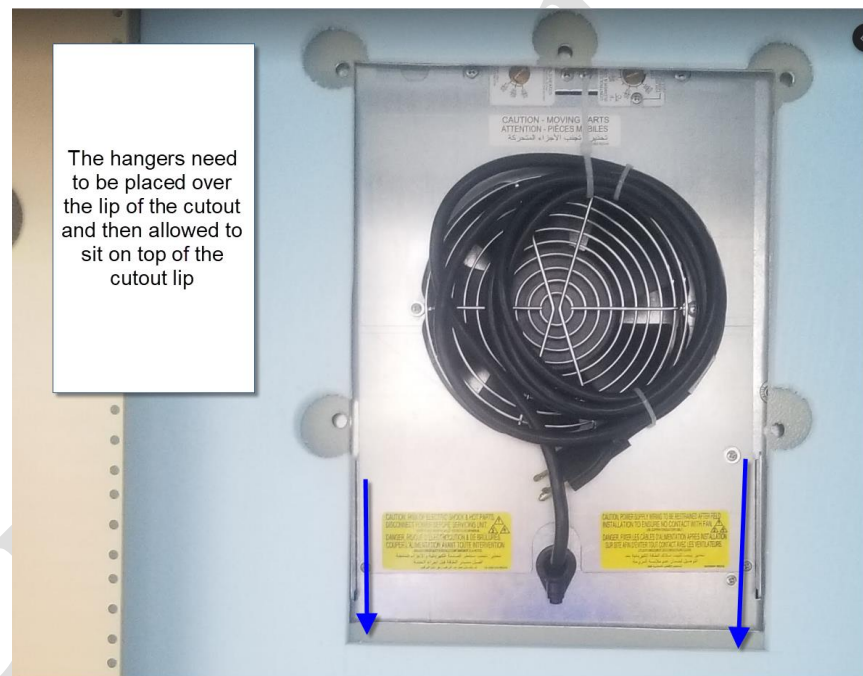

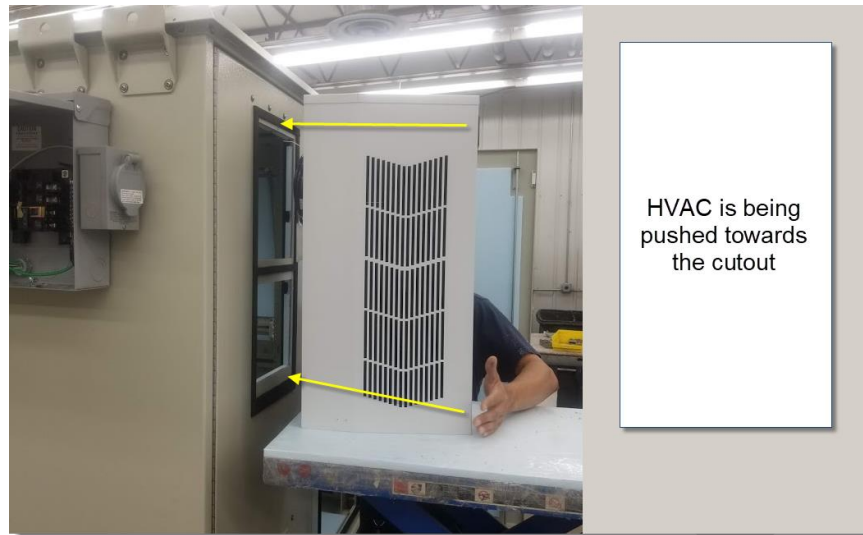

**Scope:** The following method of procedure describes the exact steps needing to be taken to mount the 110v air conditioning unit to the cutout on the enclosure. This MOP applies to the 5G and 5G Micro models of enclosure.

Your HVAC unit comes with the following parts for you to install:

- Gasket to be applied to the unit; the gasket is provided by the air conditioner manufacturer and included inside of the air conditioner shipping container.
- Hardware for mounting the air conditioner to the enclosure cutout
